

Procurement Forecasting

From Plan to Procure

Automate lifecycle management processes for all technology assets to improve IT budgeting, forecasting and procurement.

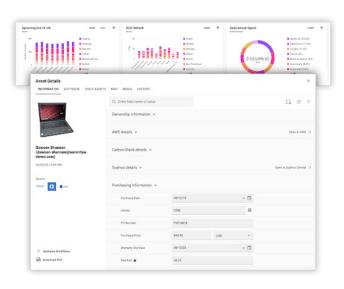

Solution

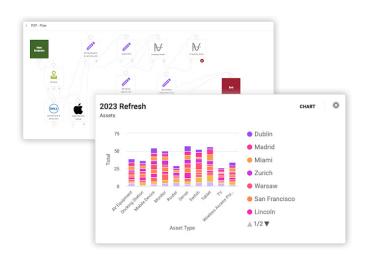

Oomnitza helps orchestrate the IT budgeting and procurement forecasting process, from Plan to Procure (P2P). Organizations can automate lifecycle management of all hardware, software and cloud assets using low-code workflows to provision technology, monitor utilization, track end-of-life and manage refreshes and renewals. This enables IT and finance teams to improve forecasting, negotiating leverage and purchasing schedules.

Plan

- Establish business growth, workforce hiring and reduction projections
- Set policies, rules and schedules for purchase, lease, EOL, refreshes, loaners and reuse per department for various user and field devices

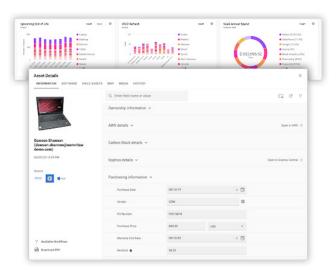

Forecast

- Determine and monitor current inventory/capacity vs. consumption/ utilization
- Identify redundancies and areas for consolidation
- Create data-driven forecast per department — drive IT and Finance alignment assessing business needs, growth and criticality

Empower

- Enable employees to choose their new tech from a catalog using selfservice end-user request portal as their devices reach EOL/refresh stage
- Handle exceptions for break fix, lost and stolen devices

Procure

- Provide accurate forecasts to procurement team to gain bulkpurchase ability and negotiating leverage
- Rightsize purchase schedules and renewals; enable warehousing at supplier, just in time delivery, and ordering against open blanket POs

Reconcile

- Automate return and recovery of old, EOL and departing employee devices; initiate decommissioning or reallocation workflows
- Update useful inventory and Financial Asset Mgmt systems to maintain financial accuracy
