oomnitza

Software and SaaS Management
From Discovery to Optimization

Automate SaaS lifecycle processes to improve utilization, mitigate cyber risk and eliminate wasteful spend.
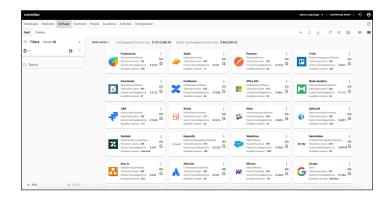

Discover ...... Classify ...... Govern ...... Manage ...... Optimize

Solution

Oomnitza automates software and SaaS lifecycle processes, from Discovery to Optimization (D2O), enabling IT teams to centrally manage, govern, enable and optimize SaaS used by employees. Organizations can reduce security, operational and financial risks associated with SaaS such as underutilization, overspend, application redundancies, incomplete offboarding and non-compliance.

Discover

- Discover **IT managed & unmanaged** SaaS & on-prem applications

- Auto-populate list of current **employees and contractors**

- Identify **users assigned** to various applications

Classify

- **Categorize** applications by function, business units, sanctioned/ unsanctioned

- Understand **user roles, licenses** and **contract assignments**

- Compile **usage patterns** and user access metrics

Govern

- Enforce security **policies** for apps with **PII, PHI,** sensitive info

- Track adherence to **SOC 2** and other **compliance mandates**

- Ensure **license compliance** to avoid over-provisioning

Manage

- **Automate workflows** for onboarding, offboarding & moves

- Reassignment and migration of **app data & workspaces**

- **Provision optional apps** based on user requests

Optimize

- **Reclaim** and **reassign** orphaned licenses and inactive users

- Track **utilization** for accurate **forecasting** and **procurement**

- Eliminate **unused** and **redundant** licenses, **rightsize renewals**
