Modern IT Asset Management for Jamf

Turn your Jamf investment into a competitive advantage.

IT Asset Management (ITAM) is a critical lever for financial accountability, audit readiness, regulatory compliance, InfoSec resilience, continuity of operations, and employee experience.

The Problem

! **Siloed asset data breaks lifecycle, tracking, and automation.**

Blind spots across the full asset lifecycle: When a device is pre- or post-deployment, inventory, security posture, and cost data splinter across Jamf, procurement, HR, finance, and security tools.

Risky offboarding & lost devices: Manual "tickets + spreadsheets" workflows mean laptops go unaccounted for, creating audit and breach risk.

Siloed data = bad decisions: IT lacks a single, trusted source of truth for hardware and software across all technology assets, so refresh forecasts, DEX metrics, and compliance audits suffer. It's hard to orchestrate and automate business processes across many siloed environments.
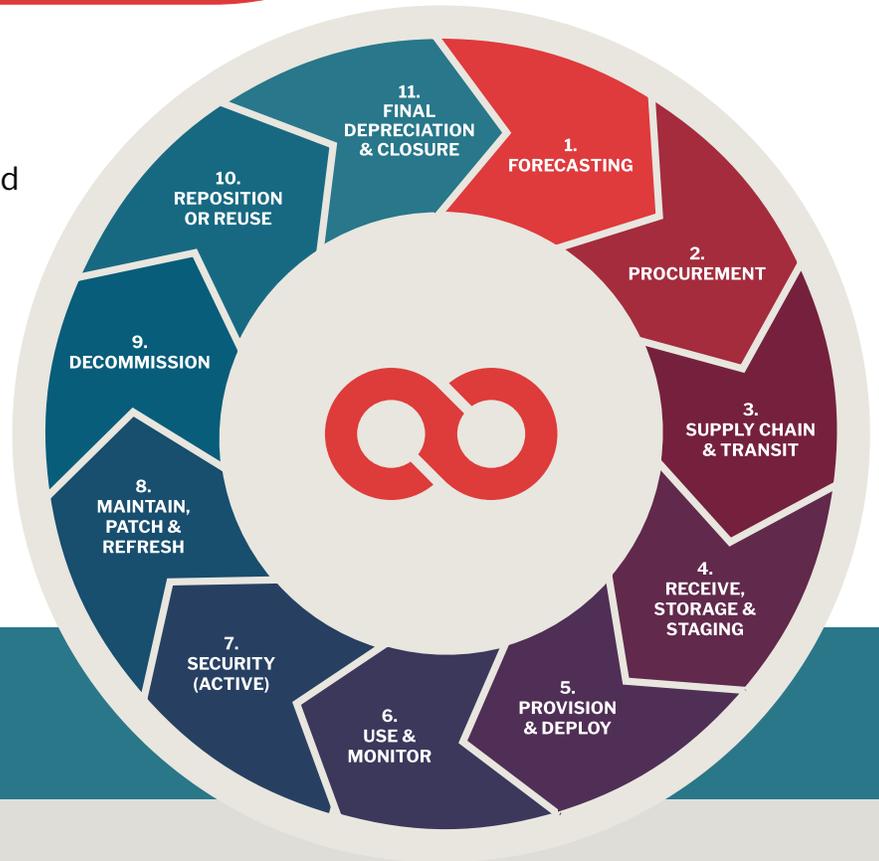

The Oomnitza + Jamf Solution

**One Platform.
All Assets.
Full Lifecycle Control.**

Oomnitza delivers value, fast.

oomnitza

Oomnitza unifies your asset data so you can:

- Get one source of truth for all Apple and non-Apple assets
- Control the full asset lifecycle with low/no-code workflows
- Prove audit readiness with clean, reconciled data
- Mitigate risk by finding gaps and auto-remediating

Transform ITAM into a strategic business enabler.

Lifecycle wheel:
1. FORECASTING
2. PROCUREMENT
3. SUPPLY CHAIN & TRANSIT
4. RECEIVE, STORAGE & STAGING
5. PROVISION & DEPLOY
6. USE & MONITOR
7. SECURITY (ACTIVE)
8. MAINTAIN, PATCH & REFRESH
9. DECOMMISSION
10. REPOSITION OR REUSE
11. FINAL DEPRECIATION & CLOSURE

Customer Outcomes:

98%+
Customer Asset Data Accuracy:

Achieve unprecedented data accuracy, ensuring decisions on trusted, real-time information.

70%
Reduction in Audit Preparation Time:

Automate data collection and audit processes, reducing preparation time and improving audit accuracy.

45%
Increase in Asset Recovery During Offboarding:

Streamline the offboarding process to recover more assets, reducing waste and unnecessary costs.

40%
Improvement in SaaS and Cloud Spend Forecasting:

Use predictive analytics to optimize budgets, drive cost savings, and improve resource allocation.

Proven Impact Across Industries:

Enterprises in education, technology, financial services, healthcare, retail, and more trust Oomnitza to reduce ITAM costs and drive operational excellence for Jamf users.
