

Elevated ITSM Starts with Modern ITAM

Unify asset data, automate lifecycle workflows, and fuel ITSM platforms with accurate, real-time intelligence—from request to retirement.

The Challenge

**Siloed Systems.
Inaccurate Data.
Growing Pressure.**

Service management platforms can only deliver value if the data they rely on is complete, accurate, and current. But most organizations still struggle with manual asset tracking, siloed systems, and CMDBs that IT teams don't trust.

64%

of CEOs have lost confidence in their IT department's ability to deliver basic services.

CIO Magazine, 2024
Gartner, 2024

63%

of IT professionals do not trust the asset data sourced from their CMDB.

Forrester's Modern Technology Operations Survey, 2024

60 -70%

of IT organizations still struggle with manual processes.

Thomson Reuters Survey, 2023
Forrester Research, 2024

66%

of ITSM organizations stuck at low maturity will be disbanded by 2028.

"How to Assess Your ITSM Maturity," Gartner, 2025

When ITSM runs on incomplete or inaccurate asset data, the result is a slower response, manual processes, and wasted spend.

The Solution

**Track Every Asset.
Trust Every Record.
Deliver Better Service.**

Oomnitza fixes the data layer beneath your ITSM platform—connecting asset information from all your systems, cleaning it up, and powering automated workflows across the lifecycle so IT can act faster, prove compliance, and control costs. With Oomnitza, IT teams eliminate manual work, enrich the CMDB, and deliver faster, more reliable services without losing control.

You achieve all this through over 1,500 turnkey connectors, Oomnitza's agentless, low-code/no-code workflows, and best practice templates.

Audit & Compliance: Stay continuously audit-ready with automated lifecycle tracking, accurate asset records, and real-time visibility across SOC 2, ISO 27001, NIST, GDPR, and more.

Security & Risk: Expose shadow IT, enforce security policies, and ensure complete lifecycle visibility to reduce risk and strengthen your InfoSec posture.

Finance & Forecasting: Control spend by eliminating unused licenses, optimizing purchases, and aligning IT assets with financial accountability—from SaaS to data center.

Experience & Productivity: Automate onboarding, offboarding, and support processes with complete, accurate asset data—improving employee experience and reducing ticket volume.

Oomnitza unifies and enriches asset data so you can:

- Improve service delivery with accurate, real-time asset data
- Control spend and reduce risk through aligned asset insights
- Automate lifecycle policies to meet audit and compliance mandates
- Strengthen security with full asset visibility and control

Power better service, security, and compliance with asset intelligence.

Customer Outcomes:

98%+

Customer Asset Data Accuracy:

Empower your ITSM platform with real-time, trusted asset intelligence.

70%

Reduction in Audit Preparation Time:

Eliminate manual asset verification and enable always-on audit readiness.

45%

Increase in Asset Recovery During Offboarding:

Streamline deprovisioning to reduce risk, cost, and shadow IT.

40%

Improvement in SaaS and Cloud Spend Forecasting:

Get ahead of budget cycles with accurate usage and lifecycle data.

Proven Impact Across Industries:

Oomnitza is trusted by enterprises across industries—including technology, financial services, healthcare, education, retail, and many more—to reduce ITAM costs and drive operational excellence.
